Project Name	AI Debt Settlement System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A professional attending networking events and conferences	Start meaningful conversations and build valuable connections	I struggle to think of relevant and personalized conversation starters	I don't know much about the person, their background or shared interests	Nervous and less confident during networking opportunities

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A borrower with multiple loans	Manage my loan repayments and reduce my debt burden	I don't know how financially stressed I am or which loan should be prioritized	I lack proper financial analysis and guidance	Worried and overwhelmed about my financial future
PS-2	A customer facing overdue loan payments	Negotiate a fair loan settlement with the lender	I don't know the appropriate settlement amount or negotiation strategy	I have limited financial knowledge and no expert assistance	Anxious and uncertain during settlement discussions
PS-3	A financial institution employee	Evaluate a customer's repayment capability and recommend suitable settlements	Manually analyzing financial records is time-consuming and inconsistent	Customer data is spread across multiple records and requires careful assessment	Overloaded and less efficient in making decisions
