Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Component	Description
External Entity	User	Registers, logs in, manages loans, and requests AI settlement reports.
Process 1	User Authentication	Validates login credentials and issues JWT tokens.
Process 2	Loan Management	Stores, updates, retrieves, and deletes loan information.
Process 3	AI Risk & Settlement Analysis	Uses Machine Learning and Google Gemini AI to analyze loan risk and generate settlement recommendations.
Process 4	Settlement Report Generation	Creates AI-based reports and allows users to download them as PDFs.
Data Store	User Database	Stores user account information securely.
Data Store	Loan Database	Stores all loan-related records and financial information.

External Service	Google Gemini AI API	Generates intelligent settlement recommendations and financial insights.
------------------	----------------------	--

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
