Project Name	AI Debt Settlement System
Maximum Marks	1 Mark

Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Implementing secure user authentication and protecting user-specific data across multiple sessions.	Implemented JWT-based authentication , password hashing using bcrypt , and Protected Routes in React to ensure secure access to authorized users only.
2	Integrating the frontend with the FastAPI backend while handling API errors, token authorization, and CORS issues.	Configured Axios interceptors to automatically attach JWT tokens, enabled CORS middleware in FastAPI, and added proper error handling and validation for API requests.
3	Generating accurate AI-powered debt settlement recommendations based on users' financial information.	Integrated the Google Gemini AI API to analyze loan details and financial metrics, producing personalized settlement recommendations, negotiation strategies, and estimated settlement percentages.
