

Project Demo Planning

Date	15 July 2026
Team ID	XXXXXX
Project Name	AI Debt Settlement System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the AI Debt Settlement System, explain the motivation, objectives, and the problems faced by borrowers in managing debt.	2	Team Member
2	Solution Overview & Architecture	Explain the proposed solution, technology stack, system architecture, workflow, and AI integration.	3	Team Member
3	User Authentication & Loan Management	Demonstrate user registration, login, loan addition, editing, deletion, and loan search functionality.	4	Team Member
4	Dashboard & AI Settlement Recommendation	Showcase dashboard analytics, financial health score, debt stress analysis, and AI-generated settlement recommendations.	4	Team Member
5	User Profile & PDF Report Generation	Demonstrate profile management and downloading the AI-generated settlement report as a PDF.	2	Team Member
6	Conclusion & Future Enhancements	Summarize project outcomes, discuss future improvements, and answer audience questions.	2	Team Member

Flow Summary: Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an AI-powered debt management and settlement solution, project objectives, and expected benefits.
2	Solution Overview	Present the system architecture, technology stack (React, FastAPI, SQLite, JWT, Gemini AI), workflow, and key modules.

3	Live Feature Demonstration	Demonstrate user registration and login, loan CRUD operations, dashboard analytics, AI settlement recommendations, profile management, and PDF report generation using real data.
4	Q&A Session	Address questions from evaluators, explain AI recommendation logic, discuss implementation challenges, security features, and future scope of the project.
